PROFILE

I am an adaptable and innovative person with 5+ years experience in research, business strategy and project management. I decided to learn web development because being a female foreigner is tough, especially when searching for proper job in the Netherlands. I wanted to boost my skill to compete in the employment market. I am creative, resilient, smart and I enjoy being a part of international and intergenerational environments.

TECH SKILLS

JavaScript	Git & Github
Typescript	HTML/CSS
React	SASS
Redux	MUI
Axios	Next.js
Node.js	Spring Boot
Express	Bootstrap
PostgreSQL	Figma
Sequelize	Python

EDUCATION

MSc in Development Studies
University Antwerp, Belgium
2015 - 2017

Bachelor in Banking and Finance
Indonesia Banking School, Indonesia
2008 - 2012

TECH JOURNEY

Full-Stack Development | *October 2022 - January 2023* **| Codaisseur**

10 intensive weeks where I learnt and applied modern technologies from back-end to front-end to build full-stack web. Scored 90% in the final assessment. Created the following projects:

- **FinWise**
A full-stack web where users can upload their Dutch-formatted pay slip and receive financial explanation on its components. Involves: React, Redux, React-Pdf, Axios, Sequelize, Express

  [Front-end ↗]   [Back-end ↗]

- **Hangman: Movie Edition** ↗   [Repository ↗]
A group project, recreated the Hangman game to guess movie titles from the TMDB API

- **MoviExplorer** ↗   [Repository ↗]
A self-practice project using Typescript, React, Redux and MUI.

- **Big Sister for Small Sister** ↗   [Repository ↗]
A page for women volunteer, focusing on supporting young, marginalised girls in North Kenya.

- **Cocktailogy** ↗   [Repository ↗]
A self-practice project using Typescript, Nextjs, and Tailwind.
